## NIC Finance Projecten continues as SpendLab Recovery

As per October 12, 2019 NIC Double Paid BV, registered under CoC 37127571 and known under the commercial name NIC Finance Projecten, will continue under the name **SpendLab Recovery B.V.**

The name change is a result of a strategic re-orientation of 'NIC Groep' which started in 2019: the “**data driven activities**”, including NIC Finance Projecten, NIC Finance Projecten Belgie BVBA, NIC Best Deal and ADC Performance Improvement will jointly continue under the name **SpendLab Group**. After the recent incorporation of NIC Inkoopprojecten by Aeves Groep, our focus will be on the realization of the national and international ambition of these “data-driven” activities. Under the management of Jos Houben (Group CEO), Raymond Deenstra (Group CFO) and Iris Lopes (Managing Director SpendLab Recovery we will continue to invest in growth and optimization.

**SpendLab Recovery** will develop as a real “**game changer**” in the area of Accounts Payable Recovery Analysis. Through data sciences, incidents and patterns will be visible and can be used to increase compliance, to repair and prevent errors and finally to improve the profitability. In this area, SpendLab Recovery is the only organization certified for ISO 27001 and ISO 9001 and compliant to the GDPR norms.”

*“A new name and image will contribute to the awareness and proudness of our people and will make clear to our clients who we are, what we do and what we want. And our ambition reaches further than people could imagine”, according to **Managing Director SpendLab Recovery Iris Lopes.***

**SpendLab Recovery** has always been well represented in the public and medical sector in the Netherlands. In the last couple of years however it has rapidly grown in the private sector, in the Netherlands as well as Belgium and beyond.

The name **SpendLab** and our logo with “the loupe and check mark” symbolize our passion, knowledge and expertise to realize the maximum “customer success” for our customers, but certainly also our internal drive for continuous innovation and improvement.

**SpendLab Recovery** is operating from Eindhoven, De Goorn, Den Dolder en Hasselt (BE) and has over 80 employees, working nationally and internationally in individual independent teams.
